Looks good. I just made a couple of minor corrections. Also sentence below didn't make sense to me. Maybe reference certain processes at the refinery that led to releases?

Elevated concentrations of PAHs related to the disposal and abandonment of the refinery were detected during the 2011 ESI, the 2015 removal assessment, and the 2016 and 2017 Phase 1 remedial investigation sampling.

Per attorney interpretation, and Susan, I have added the language for the 12-month exemption... I also revised based on Katrina's review... Let me know if you see anything else we need to change (other than the actual numbers...)

With Regards, Steve
